

NATURA 2000 NETWORK CASE STUDY:

Basso Garda

Located in the southern part of Lago di Garda

Site Type:

Birds Directive Sites (SPA)

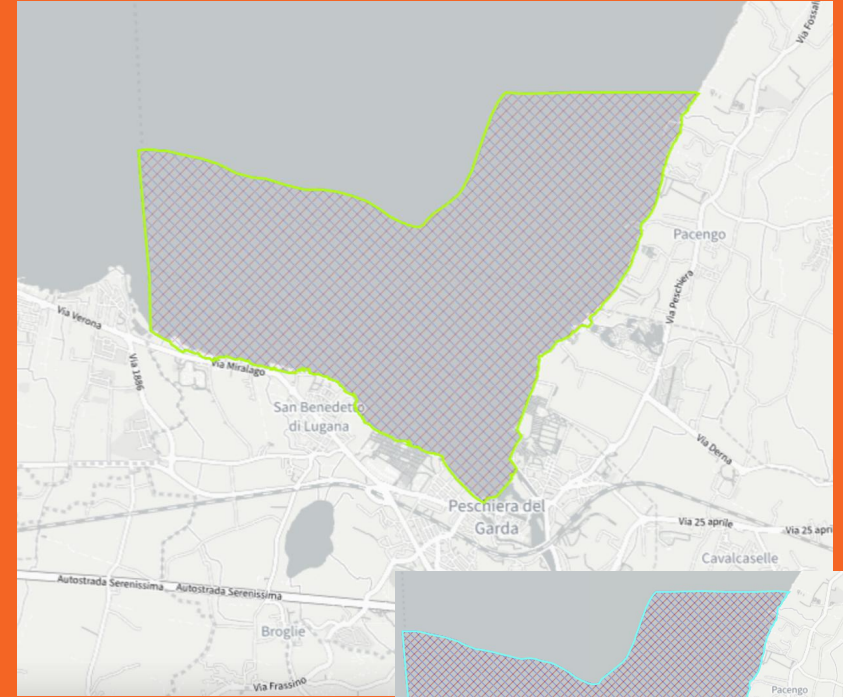

Habitats Directive Sites (SAC) - 2018-07

Site Code: IT3210018

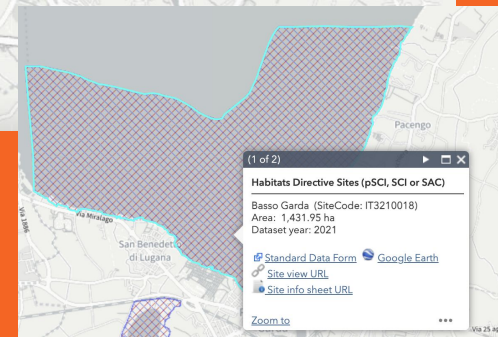

Administrative Region: Veneto, Italy

Author: Sentao ZENG

Environmental Change and Global Sustainability
Università degli Studi di Milano

Area: 1,431.95 ha
Dataset year: 2021

1. Habitats:

Habitat type (code 3150) :

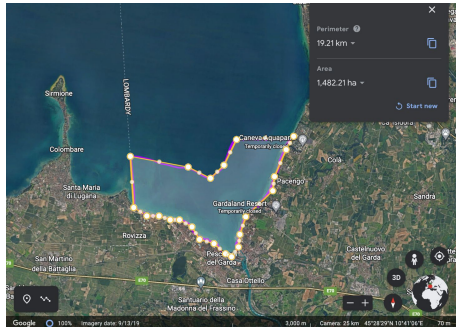

Natural eutrophic lakes with *Magnopotamion* or *Hydrocharition* —type vegetation.

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
3150 			143.1	0.00		C	C	C	C

1,432 ha

C: Significant Representativity

Natura 2000 Network Viewer & Google Earth:

Lakes and ponds with mostly dirty grey to blue-green, more or less turbid, waters, particularly rich in dissolved bases (pH usually > 7), with free-floating surface communities of the *Hydrocharition* or, in deep, open waters, with associations of large pondweeds (*Magnopotamion*).

2. Species:

Home to many species, listed in **Annex II**. Has quite a few rare abundance categories.

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species					Population in the site						Site assessment					
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D.qual.	A B C D	A B C				
						Min	Max				Pop.	Con.	Iso.	Glo.		
B	A298	Acrocephalus arundinaceus			r				C	DD	C	B	C	C		
B	A297	Acrocephalus scirpaceus			r				C	DD	C	B	C	C		
F	1103	Alosa fallax			p				P	DD	C	B	C	B		
B	A054	Anas acuta														
B	A056	Anas clypeata														
B	A055	Anas querquedula														
B	A059	Aythya ferina														
B	A061	Aythya fuligula														
B	A062	Aythya marila														
B	A060	Aythya nyroca														
A	1193	Bombina variegata														
B	A021	Botaurus stellaris														
B	A391	Phalacrocorax carbo sinensis									c			C		
B	A007	Podiceps auritus									w			V		
B	A005	Podiceps cristatus									p			C		
B	A006	Podiceps grisegena									w			R		
B	A008	Podiceps nigricollis									w			R		
B	A118	Rallus aquaticus									p			R		
F	1107	Salmo marmoratus									p			P		
B	A174	Stercorarius longicaudus									c			V		
B	A173	Stercorarius parasiticus									c			V		

Type: p = permanent, r = reproducing, c = concentration, w = wintering

2. Species: very rare ones (V)

Slavonian Grebe - *Podiceps auritus*

Natura 2000 species code: A007

Near Threatened (IUCN)

EU Population status: Threatened

Lesser Black-backed Gull - *Larus fuscus* Linnaeus

Natura 2000 species code: A183

Least Concern (IUCN)

EU Population status: Secure

2. Species: Important species of flora and fauna

Carpione del Garda - *Salmo carpio*

Natura 2000 species code: 5827

Critically Endangered (IUCN)

Threat status Europe: Critically
Endangered

3. Threats, Pressures and Activities

Natura 2000:

No information provided.

Challenges:

- Lake Garda is the largest freshwater basin in Italy and an important tourist destination.
 - Habitat fragmentation, urban sprawl, tourist activities and air and water pollution.
 - Its water is used in agriculture and as drinking water.
 - The proliferation of *cyanobacteria*
-

4. Importance

- Well conserved rare bird species and plants in the Lake Garda area.
- A good example of human-nature harmonious interaction through Special Protected Area.

“The biotopes included in this area are particularly interesting as they represent the last coastal stretches of Lake Garda, in the Veneto region, which host strips of reeds, willows and alders that are still intact.”

5. Management Plan

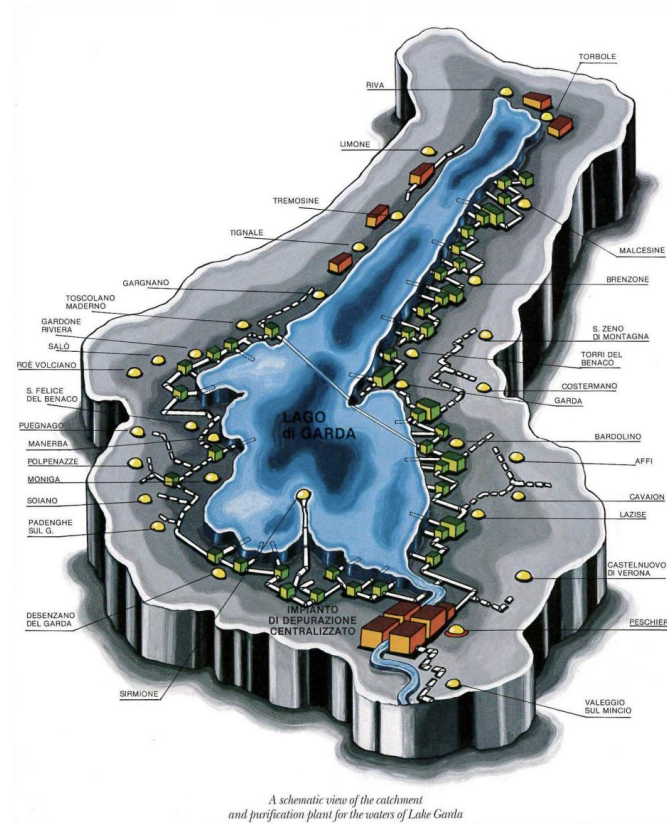

No record on Natura 2000 network.

An actual management plan does exist:

- | | |
|-------------------------------------|------------------------|
| ☐ | Yes |
| ☐ | No, but in preparation |
| ☒ | No |

ORGANIZATIONS & AUTHORITIES:

- Azienda Speciale Consorzio Garda Uno
- Garda Green Club
<https://www.gardagreen.org/>
- The Lake Garda Community

*A schematic view of the catchment
and purification plant for the waters of Lake Garda*

*The Waters Of Lake Garda The Catchment System And Condition
Of The Lake. Michele Troiano per Garda Uno Spa. Apr. 25, 2015*

Monitoring Water Quality

THE ORGANISATION:

- The Lake Garda Community is an interregional body representing 70 municipalities in the three regions neighbouring the lake: Lombardy, Veneto and Trentino-Alto Adige.
- Part of **EULAKES** (European Lakes Under Environmental Stressors) since 2010

THE SOLUTION:

- Satellite Imagery
 - Realtime water temperature monitoring
-

Lake Garda's Ecological Protocol - Garda Green

**Garda Green Ecological Protocol
consists of:**

- Communication
- Garbage and separate collection
- Sustainable mobility
- Energy production and procurement
- Cleaning and water recovery
- Energy efficiency

Territories: of the Veneto, Lombardy
and Trentino A. A. regions.

Corporate network: expanding to the
Trentino-Alto Adige and Brescia shores
of Lake Garda.

**Criteria & Verification of
Environmental Impact:** electricity,
thermal energy, building envelope,
temperature regulation, lighting,
air-conditioning, system maintenance,
garbage, sustainable mobility,
communication, soaps and detergents,
and restaurant service.

Thank you!
