

Jensen Sentao ZENG

● Legal Name: 曾森涛 ZENG SENTAO

● jensen.earth@gmail.com

● Milano Centrale, 20125 Milan, Italy

Creating great products is my passion.

A great product functions efficiently, saves time, delights customers with its human-centered and elegant design, and generates sustainable profits that have a positive impact on society.

My work location history: Switzerland, The Netherlands, Greater China Area, Ukraine, and now Milan Italy.

Experience Highlights

- Head of Product Design at Scantrust SA, Switzerland.
- Co-founder & Product Lead at 2 mobile app startups, VibesApp and Olifun.
- Digital Experience Partner at one of Shanghai's top F&B groups.
- Scientist in training: Sustainability & Climate Research.

Education

University of Milan

Master of Science (Laurea Magistrale)
Environmental Change and Global Sustainability

Beijing Jiaotong University

Bachelor of Engineering
Civil Engineering and Urban Design

Oct 2022 - Mar 2023
Shanghai / Milan

Co-founder
VibesApp.

Born in the post-pandemic era, VibesApp was a real-time event/social platform that connects people who like to go out spontaneously and local SMBs (venues, events, communities of sports or lifestyle). Our niche is between live streaming (costly to set up) and venue review (often outdated & fake). With our app, you can check the real-time vibes of your favorite local venues before committing going.

Teamed up with my other international co-founders from Vivo, I led the product, design, and tech. My work included but not limited to: UX, analytics, gamification, monetization, product-driven growth, bilingual copywriting for fundraising materials.

Our project lasted 6 months and then we decided to put it on hold due to "VC winter".

2022 - 2023
Shanghai

Digital Experience Consultant
Funka Group

Funka Group manages a few Italian restaurants, bars, and a night club in Shanghai. One of their venues, Funkadeli, is the social hub for international communities in China, both locals & tourists. It's been where people eat, drink and love for more than a decade.

I designed a digital experience that enabled a brand new loyalty program within the group's retail locations. Working with indie developers, I built a WeChat progressive app integrated with well-known POS systems in the hospitality/retail space. Later we added mobile e-Shop & online ordering to meet the customers' needs.

During this project, I also gained extensive knowledge of enterprise solutions - Shopify Plus, Square, Auphan Dining Solutions Canada, Employee Scheduler etc.

2015 - 2022
Global
Shanghai
Lausanne
Amsterdam

Head of Product Design
Scantrust SA

Team leader in a dynamic startup environment: Shanghai, Lausanne, and Amsterdam. Cross-departmental coordinations & resources planning. Continuously improving customer product experience, together with the Support & Success team.

Lead designing the digital experience throughout a variety of platforms:

- Visualization of ScanTrust's Blockchain-enabled Traceability solution for global supply chains.
- Enterprise-facing web system and mobile apps (iOS & Android)
- Consumer-facing rich media websites and mobile apps (iOS & Android)
- WeChat Official Account experience design and utilizing advanced features in real-life scenarios.
- Next generation Product Authentication web application, compatible with WeChat Mini-program.

Lead the innovation, design, and communication in Scantrust's Secure Labels, as part of the solution offerings to major brands and multinational companies:

- Built-in Scantrust's patented anti-counterfeiting technology
- Highly customizable for brand owners
- Compatible with many other security features (*info available upon request)

2018:

Lead designing all digital products of Scantrust at scale, adding new AR experience to the Scantrust QR-code scanning app, in addition to transforming our products (web, mobile, and WeChat) to contribute more to the company's growth.

2015-2017:

Lead designing the first version of the Scantrust system UI/UX from scratch - web, mobile (iOS & Android), Windows PC app, and WeChat apps.

Lead developing the branding identity of Scantrust in the early stages of the company's fast-paced growth.

Lead designing and producing multi-media marketing materials, working closely with BD & MKT team and Fortune 500 clients from different industries to deliver top-notch communication experience.

Aug 2014 - Dec 2019
Greater China

Orbit Startups Alumni
Orbit Startups

Backed by SOSV, Orbit Startups helps startups with breakthrough technologies reach global scale by expanding across emerging and frontier markets.

Orbit Startups (formerly known as ChinAccelerator) was Asia’s first startup accelerator. My co-founded startup "Olifun" was in Batch 6.

Feb 2014 - Feb 2015
Shanghai

Co-Founder | Product & Operations
Olifun Ltd.

To help people find happy hours and up-to-date events in Shanghai's coolest bars, Olifun utilized mobile technologies (Location-Based Services, Social Media, and mobile-Commerce) to enable spontaneity and bring people together.

As a co-founder, I managed:

- Product design (UI/UX). Creation from scratch. Storyboard to user feedback and iteration. User behavior analysis (in-person).
- Working with indie developers, ex bankers.
- All-aspect operations including company entity setup, trademark registration, HR, and SOP.
- Branding and marketing strategy.

Feb 2014 - May 2014
Shanghai

Entrepreneur & Account Manager
Orange Advertising Shanghai

Advertising and PR.

As a founding member, my responsibility was on design management and digital product development, aiming to bring digital content strategies to brands as 2014 saw the rise of WeChat and its ecosystem/empire (400M+ users by 2014.3).

Client portfolio: HTC, Decathlon, Trip.com, Envision Energy, Bank of China, Eco & More and other sustainability brands.

May 2013 - Feb 2014
China

Marketing & Branding Manager
COCO-MAT

Directly reporting to Country Director of Coco-Mat China, I was responsible for coordinating all the marketing activities in the China market, during which I developed my international project management and communications skills to a great degree while I was surrounded by fine design works and numerous co-branding practices.

My responsibilities & projects:

- Executing marketing and branding strategy from HQ in Athens, Greece.
- Market research, collecting information from both online and in-store.
- Making sure all the Shanghai retail stores' window displays follow the global brand guidelines.
- Assist-managing sponsorships from boutique hotels and luxury hotels such as InterContinental.
- Coordinating major events (design & branding related) of the year:
 - International Conference of Hotels and Resorts - Beijing
 - International Textile Expo - Shanghai

Coco-Mat was the perfect place to start my career. I gained experience with multi-cultural players in the world. More importantly, Coco-Mat's philosophy echoes mine: the use of natural materials in products to promote well-being and sustainability.

Other Experiences

- 2019 Hackathon Winner
Odyssey Hackathon, Groningen, the Netherlands.
- 2013 Volunteer
Sustainability & Eco Design Fair, Shanghai
- 2012 International Conference on Green Tech, Beijing
- 2012 Design for Future Art Exhibition, Beijing
- 2010 WWF Flagship Species Program for Asian Big Cats, Beijing

Design for Consumers. Delightful digital experiences.

B2B2C / B2C / Mobile Friendly

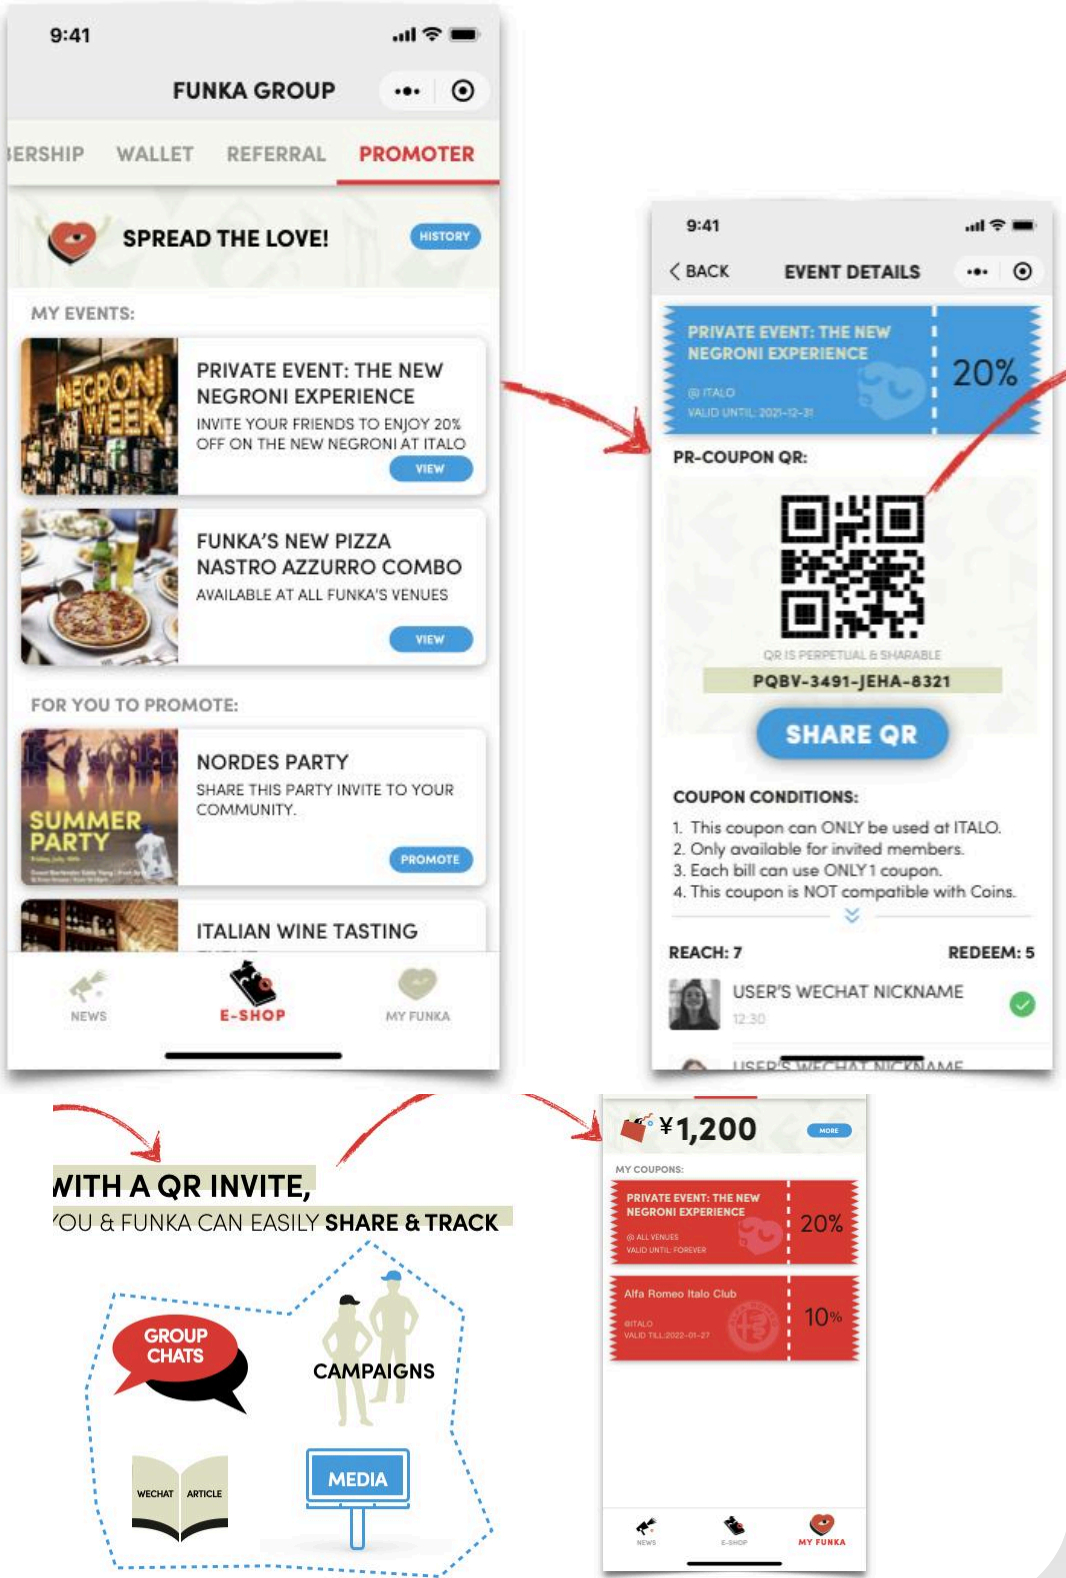

Mobile Web Design

This mobile experience (after scanning QR) was designed for Rémy Martin in Singapore.

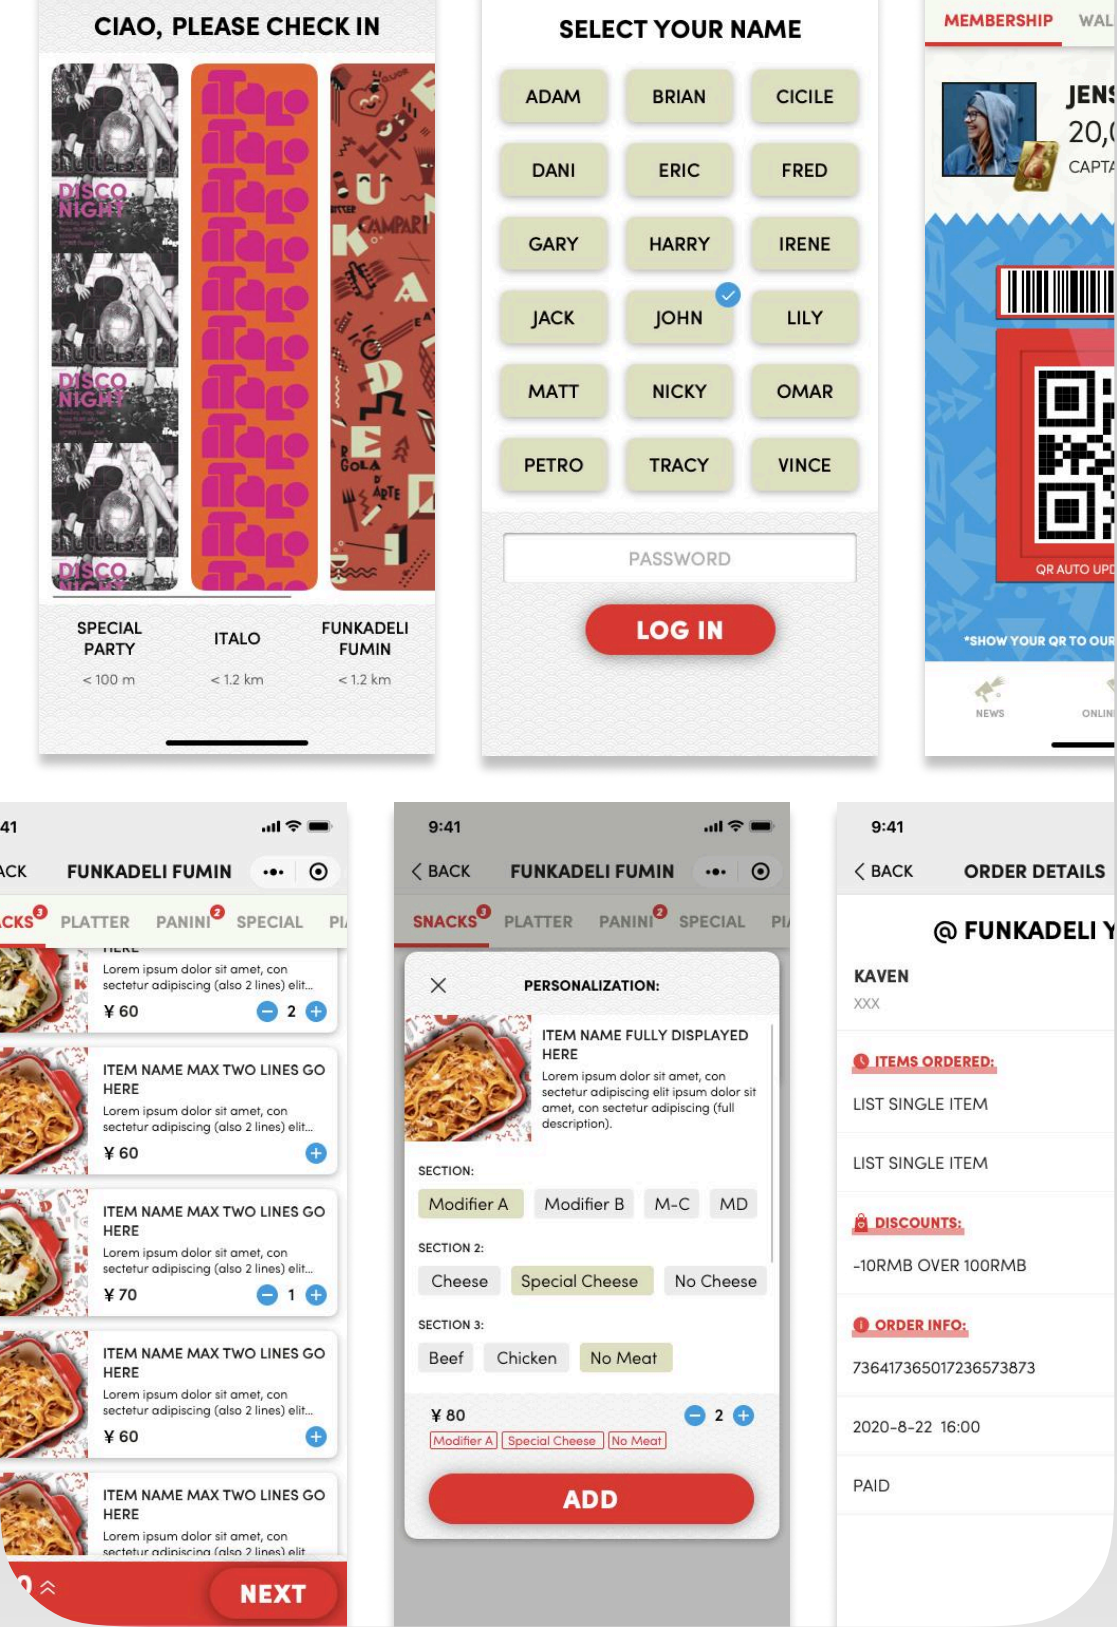

Customer Engagement

Funka Group's Mini Program is customers' favorite: easy to use, fun to share with friends.

Online Ordering

Smooth ordering food & drinks. Collecting FunkaCoins is a vibe here in downtown.

Design for Enterprises. A complete solution to fight counterfeits.

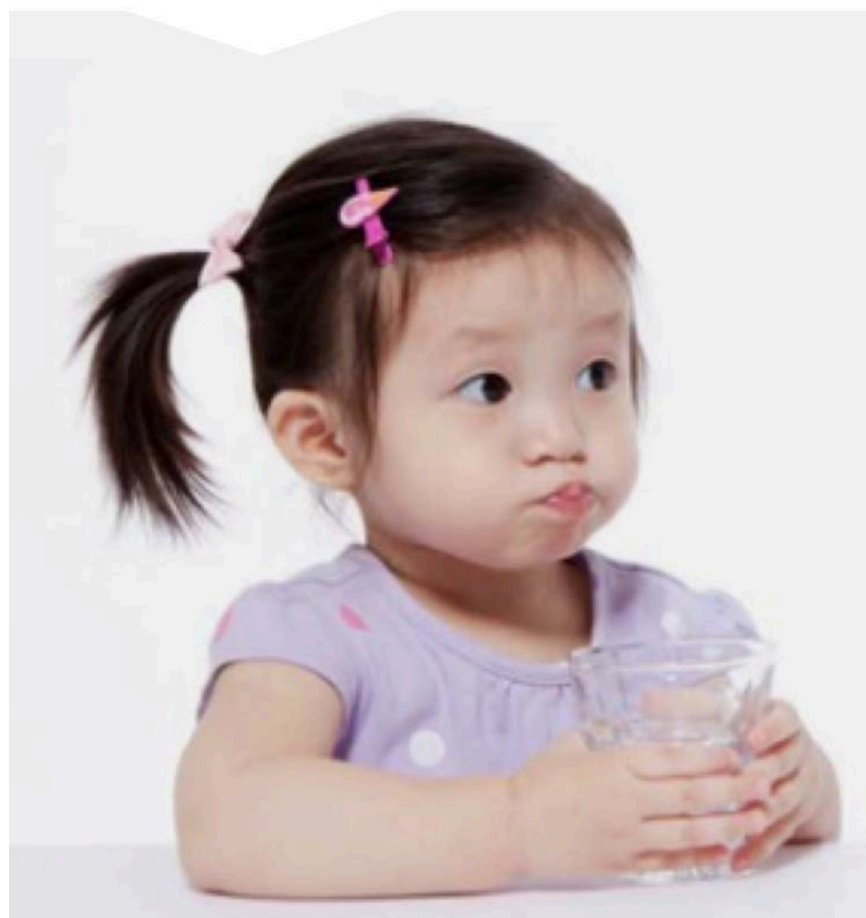

My involvement in the projects with Dow/DuPont was intense and insightful.

★ Multi-language UX

Long before Dow was merged with DuPont, I already worked on the UI/UX design of their loyalty program in India, Vietnam, China and the Middle East. Multi-language application is always a challenge in the designing process.

Welcome to
Dow Residential Water

▶▶ Industrial Label Design

With my expertise of the Scantrust secure QR codes, I designed a series of elegant labels that meet all the technical requirements and each product's brand guidelines. Challenging but fun.

✍ Branded Mobile App

I got to design a brand new stand-alone mobile app for DuPont to empower their professional customers to authenticate the water filters. Diving into 2 rounds of branding (first Dow and then DuPont) has been truly satisfactory.

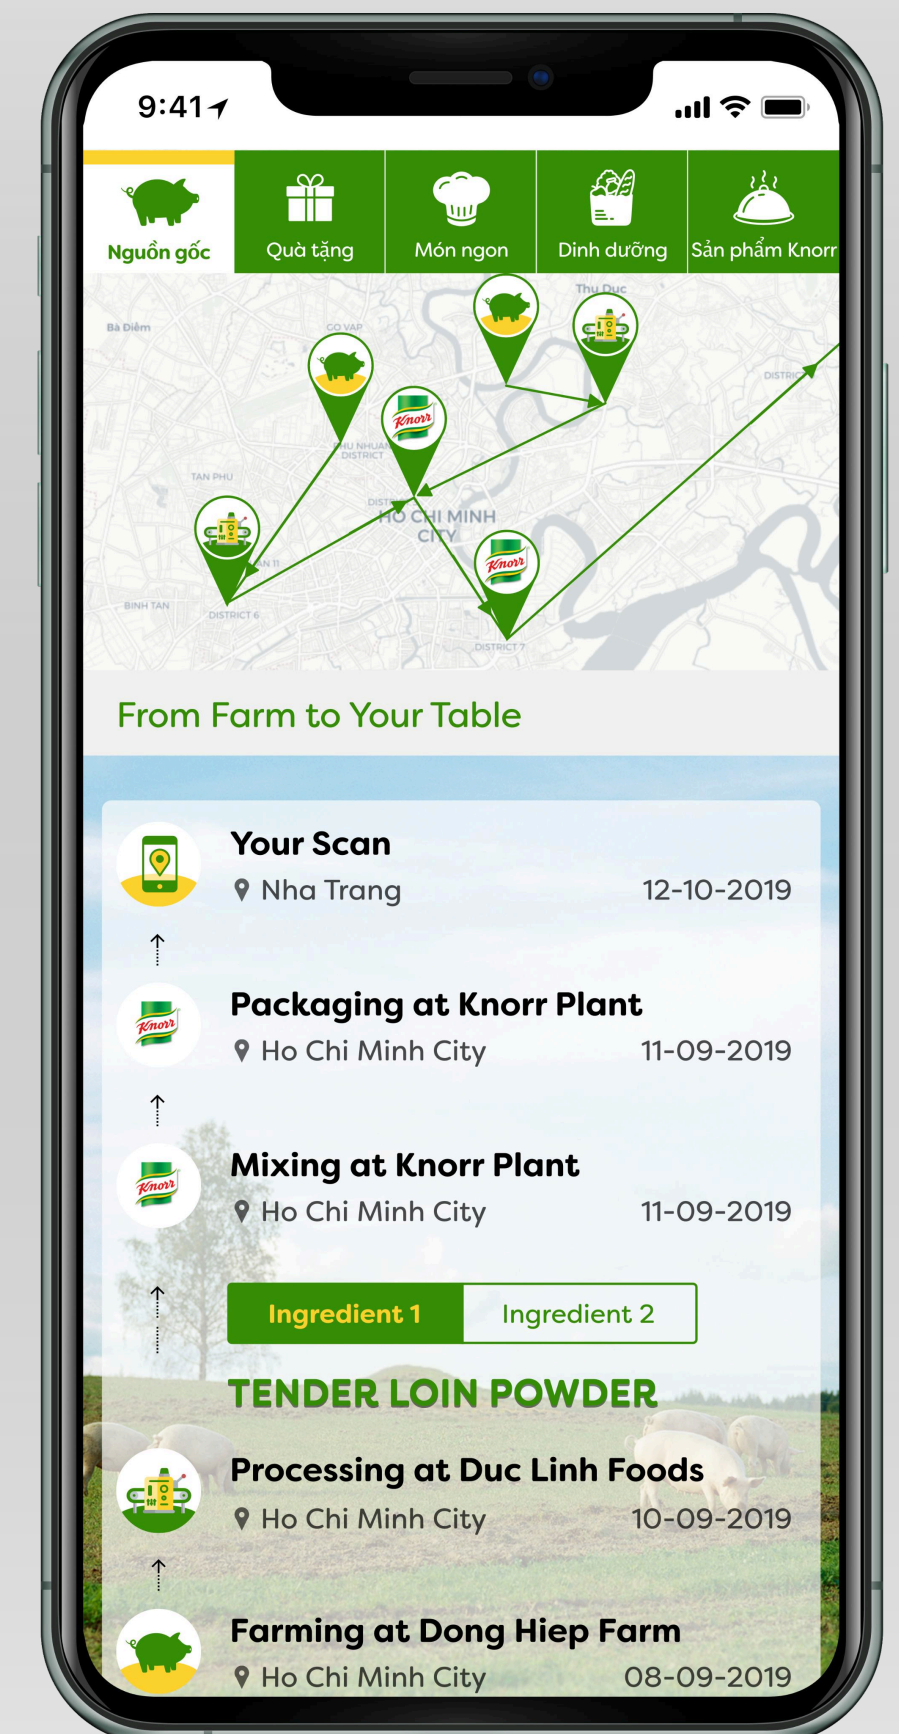

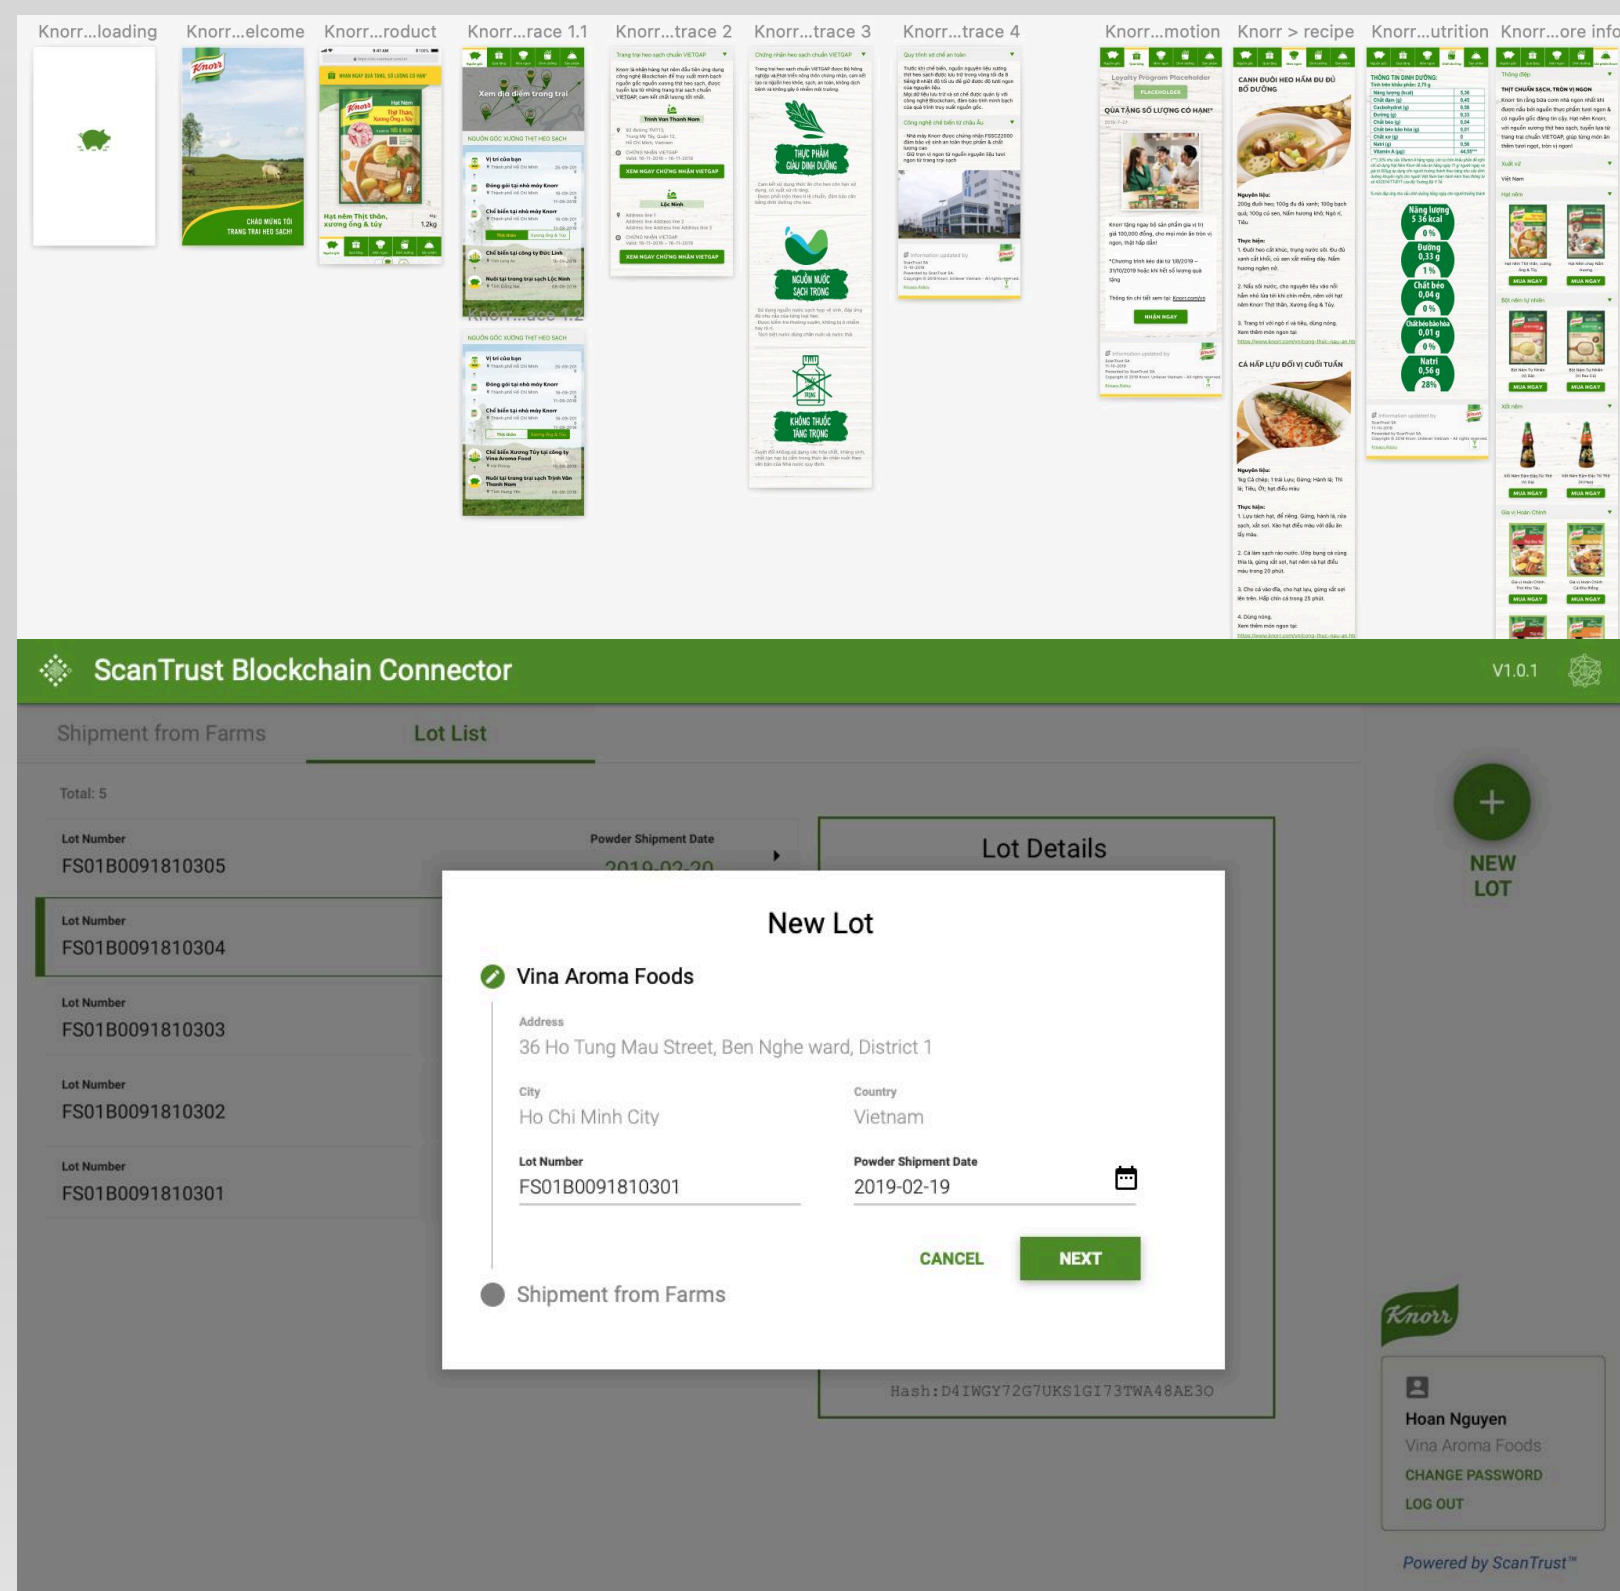

Blockchain Applications Design. Transparency & Decentralization.

Animation / UX Design / Bilingual Interface / Project Management

A blockchain connector web portal and mobile landing page to promote food traceability and transparency.

QR codes printed as part of the product packaging design. A million products with this application sold worldwide.

Label Design. Multi-purpose secure labels.

Product authentication, anti-counterfeiting, empowering end users.

Oxford University Press

A unique label to protect the Oxford University Press books from being copied in Pakistan: tamper-proof, thermal reactive, with UV light sensitive patterns and serialized anti-fake QR code.

COVID-19 Response

Two security labels were designed during the pandemic for the world's leading manufacturing companies: high quality medical gloves and COVID-19 rapid test devices.

Zippo Special Edition

Fans all over the world face the same problem of fake Zippo products, especially Zippo lovers who buy limited edition collectables. This label protects the special edition of Miss Windy's 85th Anniversary.

Mobile App Design. Always on the go!

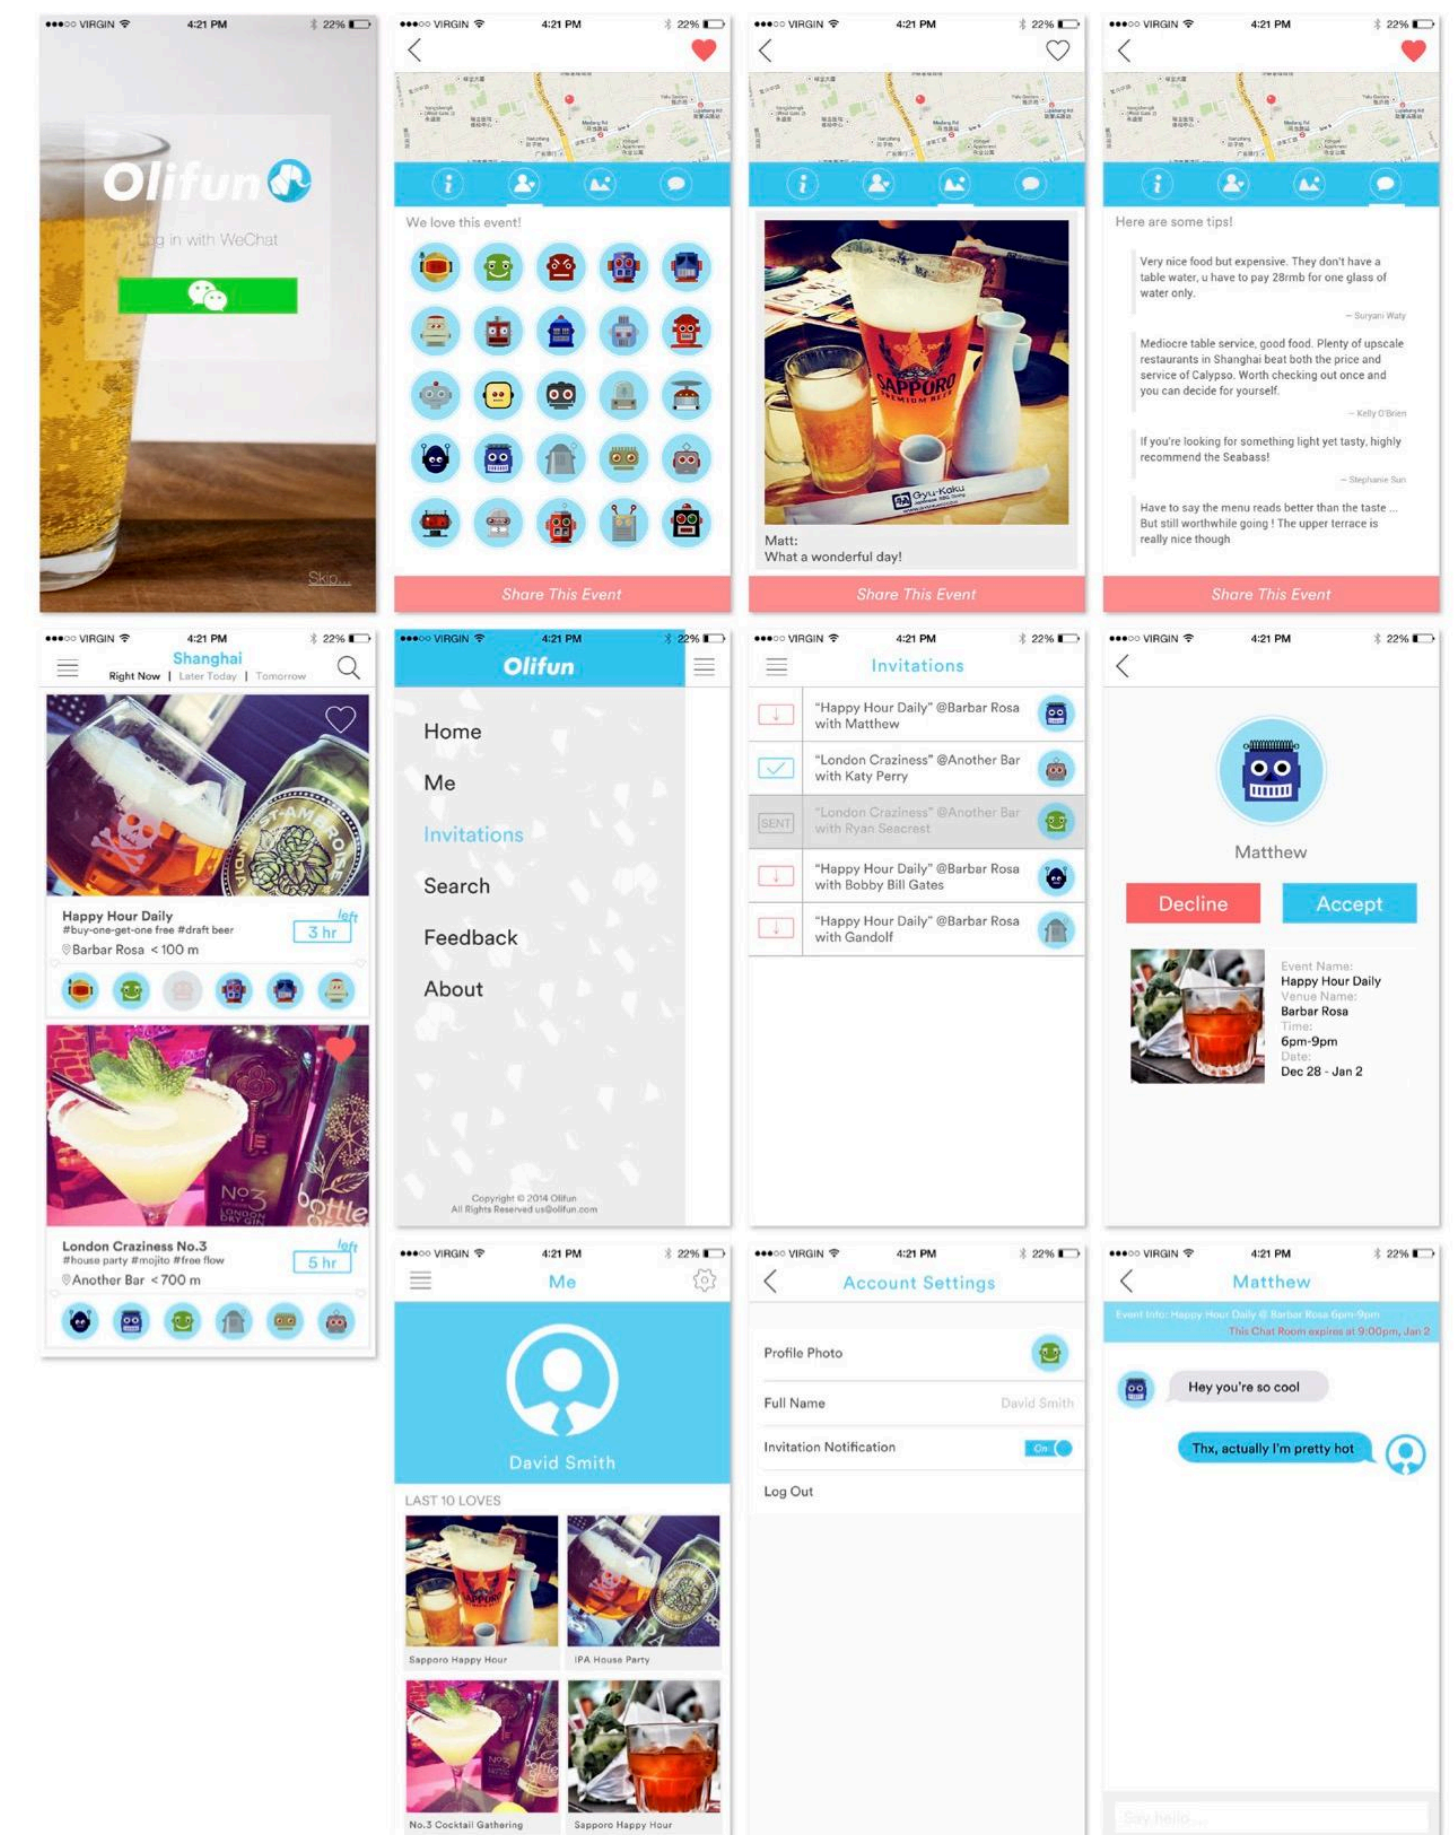

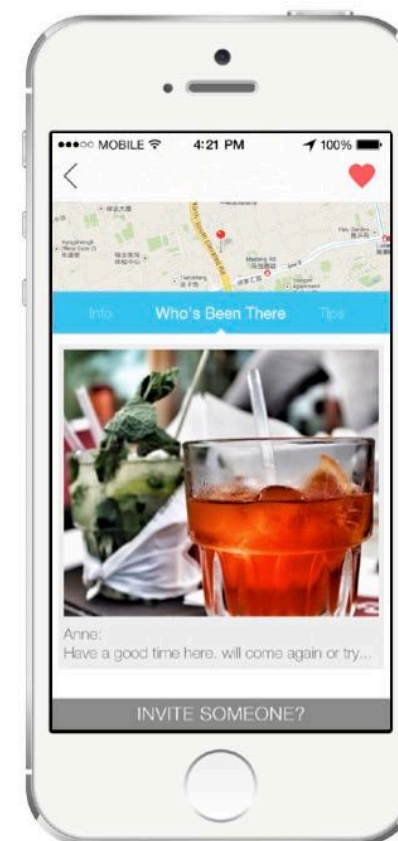

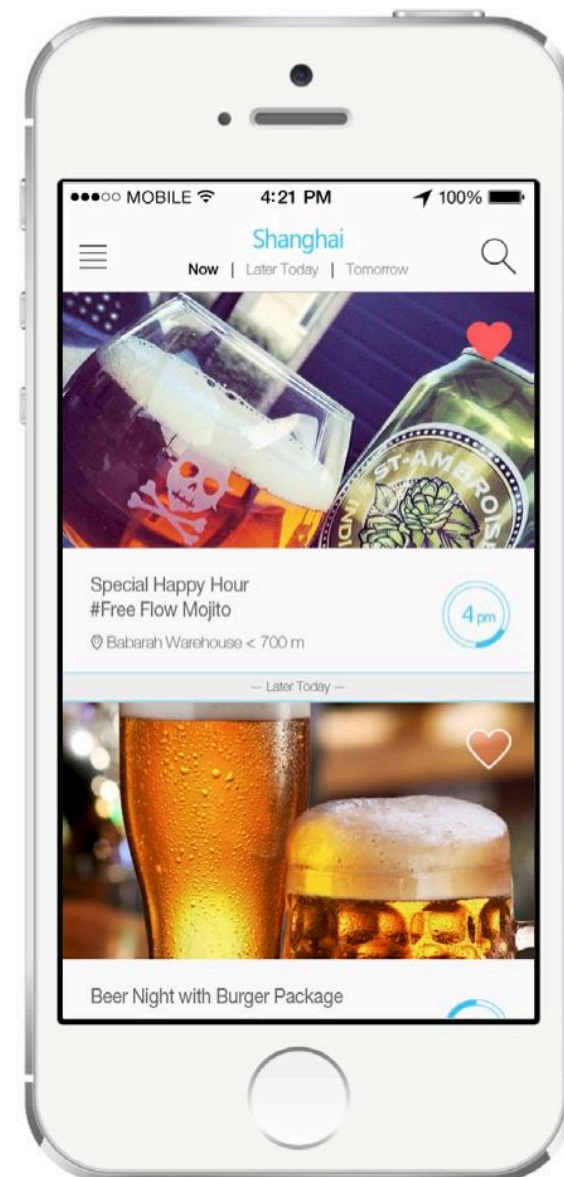

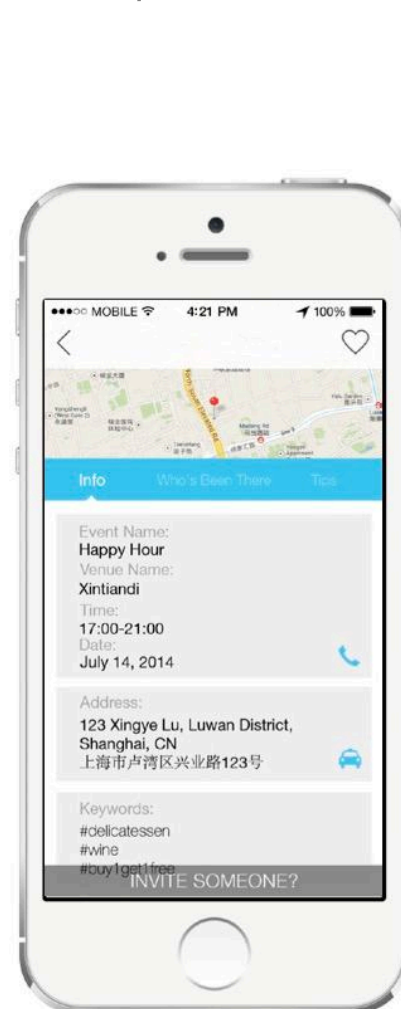

Olifun app was my first mobile app. It was fun and exciting!

To help people find happy hours and up-to-date events in Shanghai's coolest bars, Olifun utilized mobile technologies (Location-Based Services, Social Media, and mobile-Commerce) to enable spontaneity and bring people together.

As a co-founder, I managed:

- Product design (UI/UX). Creation from scratch. Storyboard to user feedback and iteration. User behavior analysis (in-person).
- Working with indie developers, ex bankers.
- All-aspect operations including company entity setup, trademark registration, HR, and SOP.
- Branding and marketing strategy.
